OVERALL RISK LEVEL	NEXUS RISK SCORE	CONFIDENCE
HIGH	80/100	95%

Transaction Details

AMOUNT UAE 100,000	PAYMENT PURPOSE Invoice payment for consulting services
ORIGINATOR Company Inc. (UAE)	ORIGINATOR BIC HSBCGB2L
BENEFICIARY Trading Ltd. (UAE)	BENEFICIARY BIC HSBCGB2L
INTERMEDIARY BANKS Emirates NBD, FAB	

Transaction Summary

The transaction constitutes a UAE 100,000 cross-border wire transfer routed via SWIFT. The payment originates from a UAE-registered company and is directed to a UAE-incorporated company. The stated purpose of the transfer is 'Invoice payment for consulting services'. The transaction was submitted for screening on [today's date] and flagged for enhanced review due to large transaction amount and risky jurisdictional profiles.

Overall Risk Assessment

This assessment has been prepared by Comply Sphere Nexus in respect of a SWIFT wire transfer totalling UAE 100,000 from Company Inc. (UAE) to Trading Ltd. (UAE). Following a structured analysis of transactional, jurisdictional, entity, and routing characteristics, the transaction has been assigned a high risk rating based on potential indicators identified. No confirmed sanctions matches were identified; however, the combination of a high transaction value, specific payment purpose, involvement of multiple intermediary banks, and high-risk jurisdictions collectively indicate potential sanctions and financial crime risk. Enhanced due diligence and senior compliance officer review are recommended prior to authorization.

Red Flags Identified

#	SEVERITY	DESCRIPTION
1	HIGH	Unusually high payment amount for consulting services.

#	SEVERITY	DESCRIPTION
2	MEDIUM	Multiple intermediary banks involved in the payment.
3	LOW	Limited additional context provided for the payment purpose.
4	MEDIUM	Originator and beneficiary banks are the same.
5	MEDIUM	Payment made to a newly incorporated entity.
6	HIGH	Potential jurisdictional risk due to the UAE origin and beneficiary.

Nexus Risk Score Dimensions

CATEGORY	SCORE	MAX
Jurisdictional Risk	16	20
Entity & UBO Risk	20	25
Transaction Characteristics	23	25
Sanctions List Exposure	18	20
Routing & Correspondent	3	10

Aggregate Nexus Risk Score: 80/100 — HIGH. Senior Compliance Officer approval required before processing.

Recommended Controls

#	CONTROL
1	Obtain a copy of the underlying invoice, contract, or engagement letter prior to authorization.
2	Enhanced due diligence to verify the legitimacy of the consulting services provided.
3	Perform additional screening verification for the newly incorporated beneficiary entity.
4	Conduct tailored correspondent banking confirmation to ensure intermediary banks' compliance.
5	Implement transaction monitoring controls to track future activity and ensure consistency with the transaction purpose.

Jurisdictional Analysis

ORIGINATOR JURISDICTION

UAE

FATF: FATF member | Risk: Elevated

BENEFICIARY JURISDICTION

UAE

FATF: FATF member | Risk: Elevated

Escalation Guidance

Given the HIGH risk classification, this transaction must not be processed without the written approval of the designated Compliance Officer or MLRO. If approval is granted, the rationale and supporting documentation must be retained in the compliance file for a minimum of five years in accordance with applicable AML/CFT record-keeping requirements. If approval is withheld, a Suspicious Transaction Report (STR) should be considered in line with the applicable regulatory framework.

Audit Defence Commentary

This assessment has been generated by the Comply Sphere Nexus platform and is intended to form part of the institution's documented sanctions compliance process. The assessment records the screening methodology applied, the lists consulted, the date of screening, the findings identified, and the risk determination reached. This record is designed to demonstrate reasonable enquiry and structured risk assessment in the event of regulatory review or audit. The assessment does not constitute a guarantee that no sanctions exposure exists and should be read in conjunction with the institution's own compliance policies and procedures.
